

Maksym Chernikov

Java, C/C++, Python, Backend, Embedded Software developer

Hello, I'm Max, a versatile developer specializing in Java, Python, and C/C++.

With experience in backend development and embedded systems, I build efficient and reliable software solutions across different domains.

Hard Skills

Game Developping/GUI Developping

- Rust(Ratatui)
- C/C++ Game development(SDL, SFML, Raylib)
- Python Game development(Pygame, Tkinter)

Backend Developping

- Python Back End Development(Flask, FAST API) Java Back End
- Java Development(Spring Boot, Spring JPA, Hibernate)
- Javascript Back End Development Node js(Express.js)
- Rust Back End Development(tokio, axum)

Databases

- PostgreSQL, MONGO DB, MySQL, OracleDB

Embedded development

- ESP32, STM32, Roboheart(Hercules), ArduinoUNO
- Raspberry PI

Tools

- Git
- Docker, Jenkins
- Unit-testing
- Apache kafka, RabbitMQ, OpenAPI
- Maven/Gradle

Other Knowledges

- Computer Architecture
- Networking Machine
- Assembly Programming
- Linux System Programming

Soft Skills

- Problem Solving
- Team work
- Attention to Details

Languages

- Russian/Ukraine(Native)
- Slovak/Czech(B2)
- English(B2)

Education

Faculty of Management Science and Informatics,
University of Žilina
2024–now

Faculty of Electrical Engineering and Information
Technology, University of Žilina
2022–2024

Middle school

2019–2022

Contact Info

Work experience

Junior Backend Developer (Python) – FUERGY energy
July 2023 – October 2023 | Žilina, Slovakia

- Assisted in developing and maintaining backend services using Python under senior developers' guidance.
- Supported database operations with PostgreSQL, including writing queries and optimizing data retrieval.
- Helped automate workflows by maintaining and improving web scraping tools for data collection.
- Gained hands-on experience with message brokers (Kafka, RabbitMQ) for task queue management.
- Contributed to code reviews and testing to ensure system reliability

Junior Backend Developer (Java) – remobile*
February 2025 – June 2025 | Bratislava, Slovakia

- Developed backend components for Netgrif low-code platform using Spring Boot
- Worked with PostgreSQL for data storage and workflow configurations
- Participated in daily standups and Agile development process
- Gained exposure to event-driven architecture concepts (including Kafka)
- Assisted in REST API development and performance optimizations

Junior Embedded Developer (C++) – FRI UNIZA
Oct 2024 – Feb 2025 | Žilina, Slovakia

- Developed firmware for RC vehicles using ARM Hercules (RoboHeart) microcontroller
- Implemented motor control and wireless communication protocols
- Created technical documentation for hardware-software integration
- Tested and debugged embedded systems in lab environment

Projects

PYTHON(WEB, GAME DEV)

- Interactive Website for saling Tesla cars(<https://github.com/Maksikos-ctrl/Tesla-site>)
- Portfolio for web-designer (<https://github.com/Maksikos-ctrl/Designer-Portfolio>)
- Mini-online-shop in Flask(<https://github.com/Maksikos-ctrl/online-shop-in-flask>)
- Trivia quiz game(<https://github.com/Maksikos-ctrl/SemestralnaPracaPython>)
- 3DModellerCad(<https://github.com/Maksikos-ctrl/3dModellerCAD>)
- Space Invaders(<https://github.com/Maksikos-ctrl/Space-Invaders-Py>)
- Minecraft(<https://github.com/Maksikos-ctrl/ursina-minecraft>)
- VinlandSagaGame(<https://github.com/Maksikos-ctrl/VinlandSagaGame>)

CONTRIBUTED TO

- Mafia online(<https://github.com/arduinka55055/mafia>)
- Hackaton(<https://github.com/sudohubdev/XAKATON>)

JAVA(GUI, WEB)

- LegoWebStore(<https://github.com/Maksikos-ctrl/LegoSocialNetwork>)
- Lingon(<https://github.com/Maksikos-ctrl/Lingon>)
- BusinessCard(<https://github.com/Maksikos-ctrl/BusinessCard>)
- StavkovaKancelarie(https://github.com/Maksikos-ctrl/Stavkova_kancelarie_UNIZA_maven)
- Multiplayer2DGame(<https://github.com/Maksikos-ctrl/Multiplayer2dGame-Server>)
- Rental-System_java(https://github.com/Maksikos-ctrl/Rental-System_java)

C/C++ , Game dev, Embedded

- RebellionFighter(<https://github.com/Maksikos-ctrl/RebellionFighterStarWarsCZSK>)
- Keylogger(<https://github.com/Maksikos-ctrl/Keylogger>)
- Traffic Sniffer(https://github.com/Maksikos-ctrl/Traffic_sniffer_uniza)
- MqttEsp32ClientBroker(<https://github.com/Maksikos-ctrl/MqttEsp32ClientBroker>)
- SmartClimateStation(<https://github.com/Maksikos-ctrl/smartclimate-station>)

Rust(Web, GUI)

- SystemMonitor(<https://github.com/Maksikos-ctrl/SystemMonitor>)
